**#80-246GT
ALUM SC TANK MUSTANG
'2011-14 - LARGE CAP STYLE**

- 1) First make sure the engine and coolant are at a safe temperature.**
- 2) Drain the stock Supercharger coolant tank, siphoning out as much as possible**
- 3) Retain the fluid, if clean you can re-use it.**
- 4) Unbolt the stock tank and remove the hoses.**
- 5) Install the new tank in the reverse of removal.**
- 6) Refill with drained coolant leaving room for the coolant to expand.**
- 7) Close the cap by following the directions on the cap lid .**
