

ENGINE FILTER THREAD CHART

FINDING THE CORRECT FILTER OR ADAPTER PART NUMBER

* To determine the correct part number for your filter or filter adapter consult the application thread chart on this page. The chart lists the thread size and the gasket size that will match the seal pad of that engine. If you know the thread and gasket sizes of your present filter that can be matched to our specs. Chassis and ground clearance should be checked to determine which length filter or adapter set-up will fit best.

* CM filters can be cross referenced to other brands of spin-on filters. If you have a problem trying to find the thread and o-ring sizes required by your application, call, fax, or e-mail us with the part number of the filter you are using now. In most cases we can find the right filter for you.
